

HOLCOSLIP

# SLIP AGENT FOR PET

CREATE A GREAT IMPRESSION  
AND SAVE MONEY

With branding ever more important in retail, no company can now afford to sell its products in scuffed and scratched PET bottles. It's a question of trust. For end users, packaging that looks poor even before it leaves the store raises questions about the quality of the product inside.

### SMALL MARKS BECOME BIGGER LATER

The biggest cause of scratches and scuffing is not handling at the point of sale, but during production, and particularly the moment when a preform is released from the cavities of the preform molding machine into the octabin bulk box. Friction causes the preforms to stick slightly as they are released into the octabin, causing small marks. These marks then scale up proportionally when the preform is eventually blown into a bottle.

### LESS DAMAGE AND MORE STORAGE WITH HOLCOSLIP

Holcoslip for PET reduces the crucial Coefficient of Friction (COF) that is the main cause of scratching and damage during preform production. Lowering the COF ensures the preforms release more easily from the preform cavities, and also significantly reduces the incidence of scratching and scuffing as they drop into the octabin.

### A PROVEN AND COST-EFFICIENT SLIP AGENT THAT ALSO ADDS VALUE

As well as reducing scratching and scuffing, low friction Holcoslip also has benefits for costs. These include lower dosing than other slip agents for the same performance and the ability to store a higher amount of preforms in every octabin, reducing storage and transportation costs. Holcoslip is compatible with most liquid additive / colorant dosing systems.

Holcoslip	Designed for	Scratch Protection	Compliance	Recycling
Holcoslip 271	brand protection, liquid product suitable for Injection Molding	√√√	FDA, EU*	√√√
Holcoslip 266	brand protection, liquid product suitable for Injection Molding	√√	GB, EU*	√√√

\* Please contact us for specific information

### HOLCOSLIP BENEFITS AT A GLANCE

- ✓ Eject preforms more easily from the core of the mold
- ✓ Pack more preforms into every octabin bulk bin (~10% more preforms per bin)
- ✓ Get optimum slip performance at lower dosing levels than other solutions
- ✓ Bio-based
- ✓ Environmentally and food-contact safe
- ✓ Negligible influence on your PET conversion process and no discoloration (e.g. no yellowing or black specks)
